📘 Lesson 8: Attend a Sprint Review Meeting

Vocabulary Focus

1. **Release notes** *(noun)*
   → A document describing what has been added, changed, or fixed in a release
   Example: “The BA will prepare the release notes before deployment.”

---

2. **Pending** *(adjective)*
   → Not yet completed or approved
   Example: “The UI fix is still pending for the next sprint.”

---

3. **Out of scope** *(adjective phrase)*
   → Outside what was planned for the sprint
   Example: “This feature is out of scope for this sprint.”

---

4. **Feedback** *(noun)*
   → Comments or reactions to something shown
   Example: “Can I give some feedback on the layout?”

---

5. **Acceptance criteria** *(noun)*
   → Conditions a feature must meet to be approved
   Example: “This feature meets the acceptance criteria.”

---

6. **Deliverable** *(noun)*
   → A completed item of work ready to be presented or handed over
   Example: “The main deliverable for this sprint is the dashboard.”

---

7. **Sign off on** *(phrasal verb)*
   → To officially approve something
   Example: “The BA needs to sign off on the feature before release.”

---

8. **Hand off** *(phrasal verb)*
   → To pass completed work to another person or team
   Example: “We’ll hand off the build to the QA team.”

---

9. **Go live** *(verb phrase)*
   → To be released and available to users
   Example: “The feature is ready to go live.”

---

10. **Wrap up** *(phrasal verb)*
    → To finish or bring something to a close
    Example: “Let’s wrap up the meeting.”

---

11. **Showcase** *(verb)*
    → To present something highlighting its best qualities
    Example: “We’ll showcase the new feature to the client.”

---

12. **Walk through** *(phrasal verb)*
    → To explain something step by step
    Example: “Let me walk you through the new dashboard.”

Language Focus

---

1. “Walk [someone] through [something]”

Intent: Present a feature step by step
Example: “Let me walk you through the new login flow.”
Alternative: “I’ll take you through the new login flow.”

---

2. “Give feedback on [something]”

Intent: Share or invite feedback
Example: “Can I give some feedback on the button placement?”
Alternative: “I have some comments on the button placement.”

---

3. “Meet the acceptance criteria”

Intent: Confirm completion/approval
Example: “This feature meets the acceptance criteria.”
Alternative: “This feature checks all the boxes we set in planning.”

---

4. “Sign off on [something]”

Intent: Officially approve a feature
Example: “The BA needs to sign off on the payment module.”
Alternative: “The BA needs to give the green light.”

---

5. “Out of scope for this sprint”

Intent: Indicate something not planned
Example: “The dark mode feature is out of scope for this sprint.”
Alternative: “That wasn’t part of the plan for this sprint.”

---

6. “Ready to go live”

Intent: Confirm release readiness
Example: “The onboarding flow is ready to go live.”
Alternative: “The feature is all clear for release.”

Reading

A sprint review is held at the end of each sprint. The team presents the deliverables to the PM, BA, and sometimes the client, showcasing the key features completed during the sprint.

Each developer or QA takes turns to walk the team through their work, confirming that each feature meets the acceptance criteria agreed upon during planning.

Attendees give feedback and may raise concerns. If something is incomplete or pending, it may be flagged as out of scope and moved to the backlog.

Once approved, the PM or BA signs off on the feature and hands off the work to the release team. When ready, the feature goes live. The team also prepares release notes for the client.

At the end, the Scrum Master wraps up the meeting by summarizing outcomes and next steps.

Questions

1. Who presents the sprint deliverables and to whom?
2. How does the team handle feedback from stakeholders?

Dialogue (Sprint Review Meeting)

SM: “Alright everyone, welcome to our Sprint 12 review. We’ll be presenting our deliverables today. Dev, do you want to kick off?”

Dev: “Sure. Let me walk you through the new dashboard. On the main screen, we added a filter panel. Users can filter by date, category, and status. The charts update in real time.”

BA: “This meets the acceptance criteria we agreed on — good work. Anything else to showcase before I sign off on it?”

Dev: “Yes, users can now export data as a CSV file.”

BA: “Nice addition. Can I give some feedback on the export button placement? It’s a bit hard to see.”

Dev: “Good point. That might be out of scope for this sprint — we can fix it next sprint.”

BA: “Sure. I’ll add it to the backlog and update the release notes. I’m happy to hand off to the release team.”

SM: “Perfect. To wrap up — the dashboard is approved and ready to go live, with one UI improvement pending. Great work everyone!”

Exercise

Fill in the blanks

1. Let me _____ you _____ the new dashboard.
2. This feature _____ we agreed on.
3. Anything else before I _____ it?
4. Can I _____ on the UI?
5. That might be _____ for this sprint.
6. The feature is approved and _____.

👉 Answers:

1. walk / through
2. meets the acceptance criteria
3. sign off on
4. give feedback
5. out of scope
6. ready to go live

Ordering Task (Sprint Review Flow)

Correct flow:
Start → Walkthrough → Confirm → Feedback → Respond → Wrap up

Role-play

Scenario: Sprint Review Meeting

Scrum Master (SM):

- Open and guide the meeting
- Ask Dev to present
- Wrap up and confirm

Developer:

- Walk through the feature

- Explain functionality
- Respond to feedback

BA / PM:

- Confirm acceptance criteria
- Give feedback
- Sign off and update release notes

Discussion Questions

1. What do you usually present in a sprint review?
2. How does your team handle out-of-scope feedback?
3. What do you include in release notes?

Homework

🎤 Record Your Talk

Record yourself walking through a feature:

- What the feature does
- How it works
- Whether it meets acceptance criteria
